

ENGINEERING THE EVOLUTION OF WORKSPACES

BlockAid is an acoustically treated focus booth offering a high degree of both audio and visual privacy for private calls and concentrative work.

It is a space from which activities relying on the spoken word can be undertaken with much reduced noise impact on the larger office space and much improved privacy.

INTRODUCTION

WE ARE C.O DESIGNS

With the return to the office an increasing number of employees are working in open plan settings. Attempting to concentrate on individual tasks is difficult with the distractions in this type of office layout. Audio visual, Zoom & Teams calls are the order of the day, which in turn disturb & are a distraction for colleagues in the surrounding area.

In addition, many conversations require a level of privacy which is difficult in an open-plan setting, hence the need for places providing enhanced sound insulation in addition to a level of visual privacy - demarcated spaces that also communicate that interruptions are not welcome.

BLOCKAID

PRIVACY BOOTH RANGE

BlockAid has been acoustically tested and shows a notable increase in privacy for the user by substantially reducing what can be deciphered or understood by those on the outside.

These booths are ideal for virtual meetings and concentrative work.

BlockAid:
W1200 x L1350 x H1800

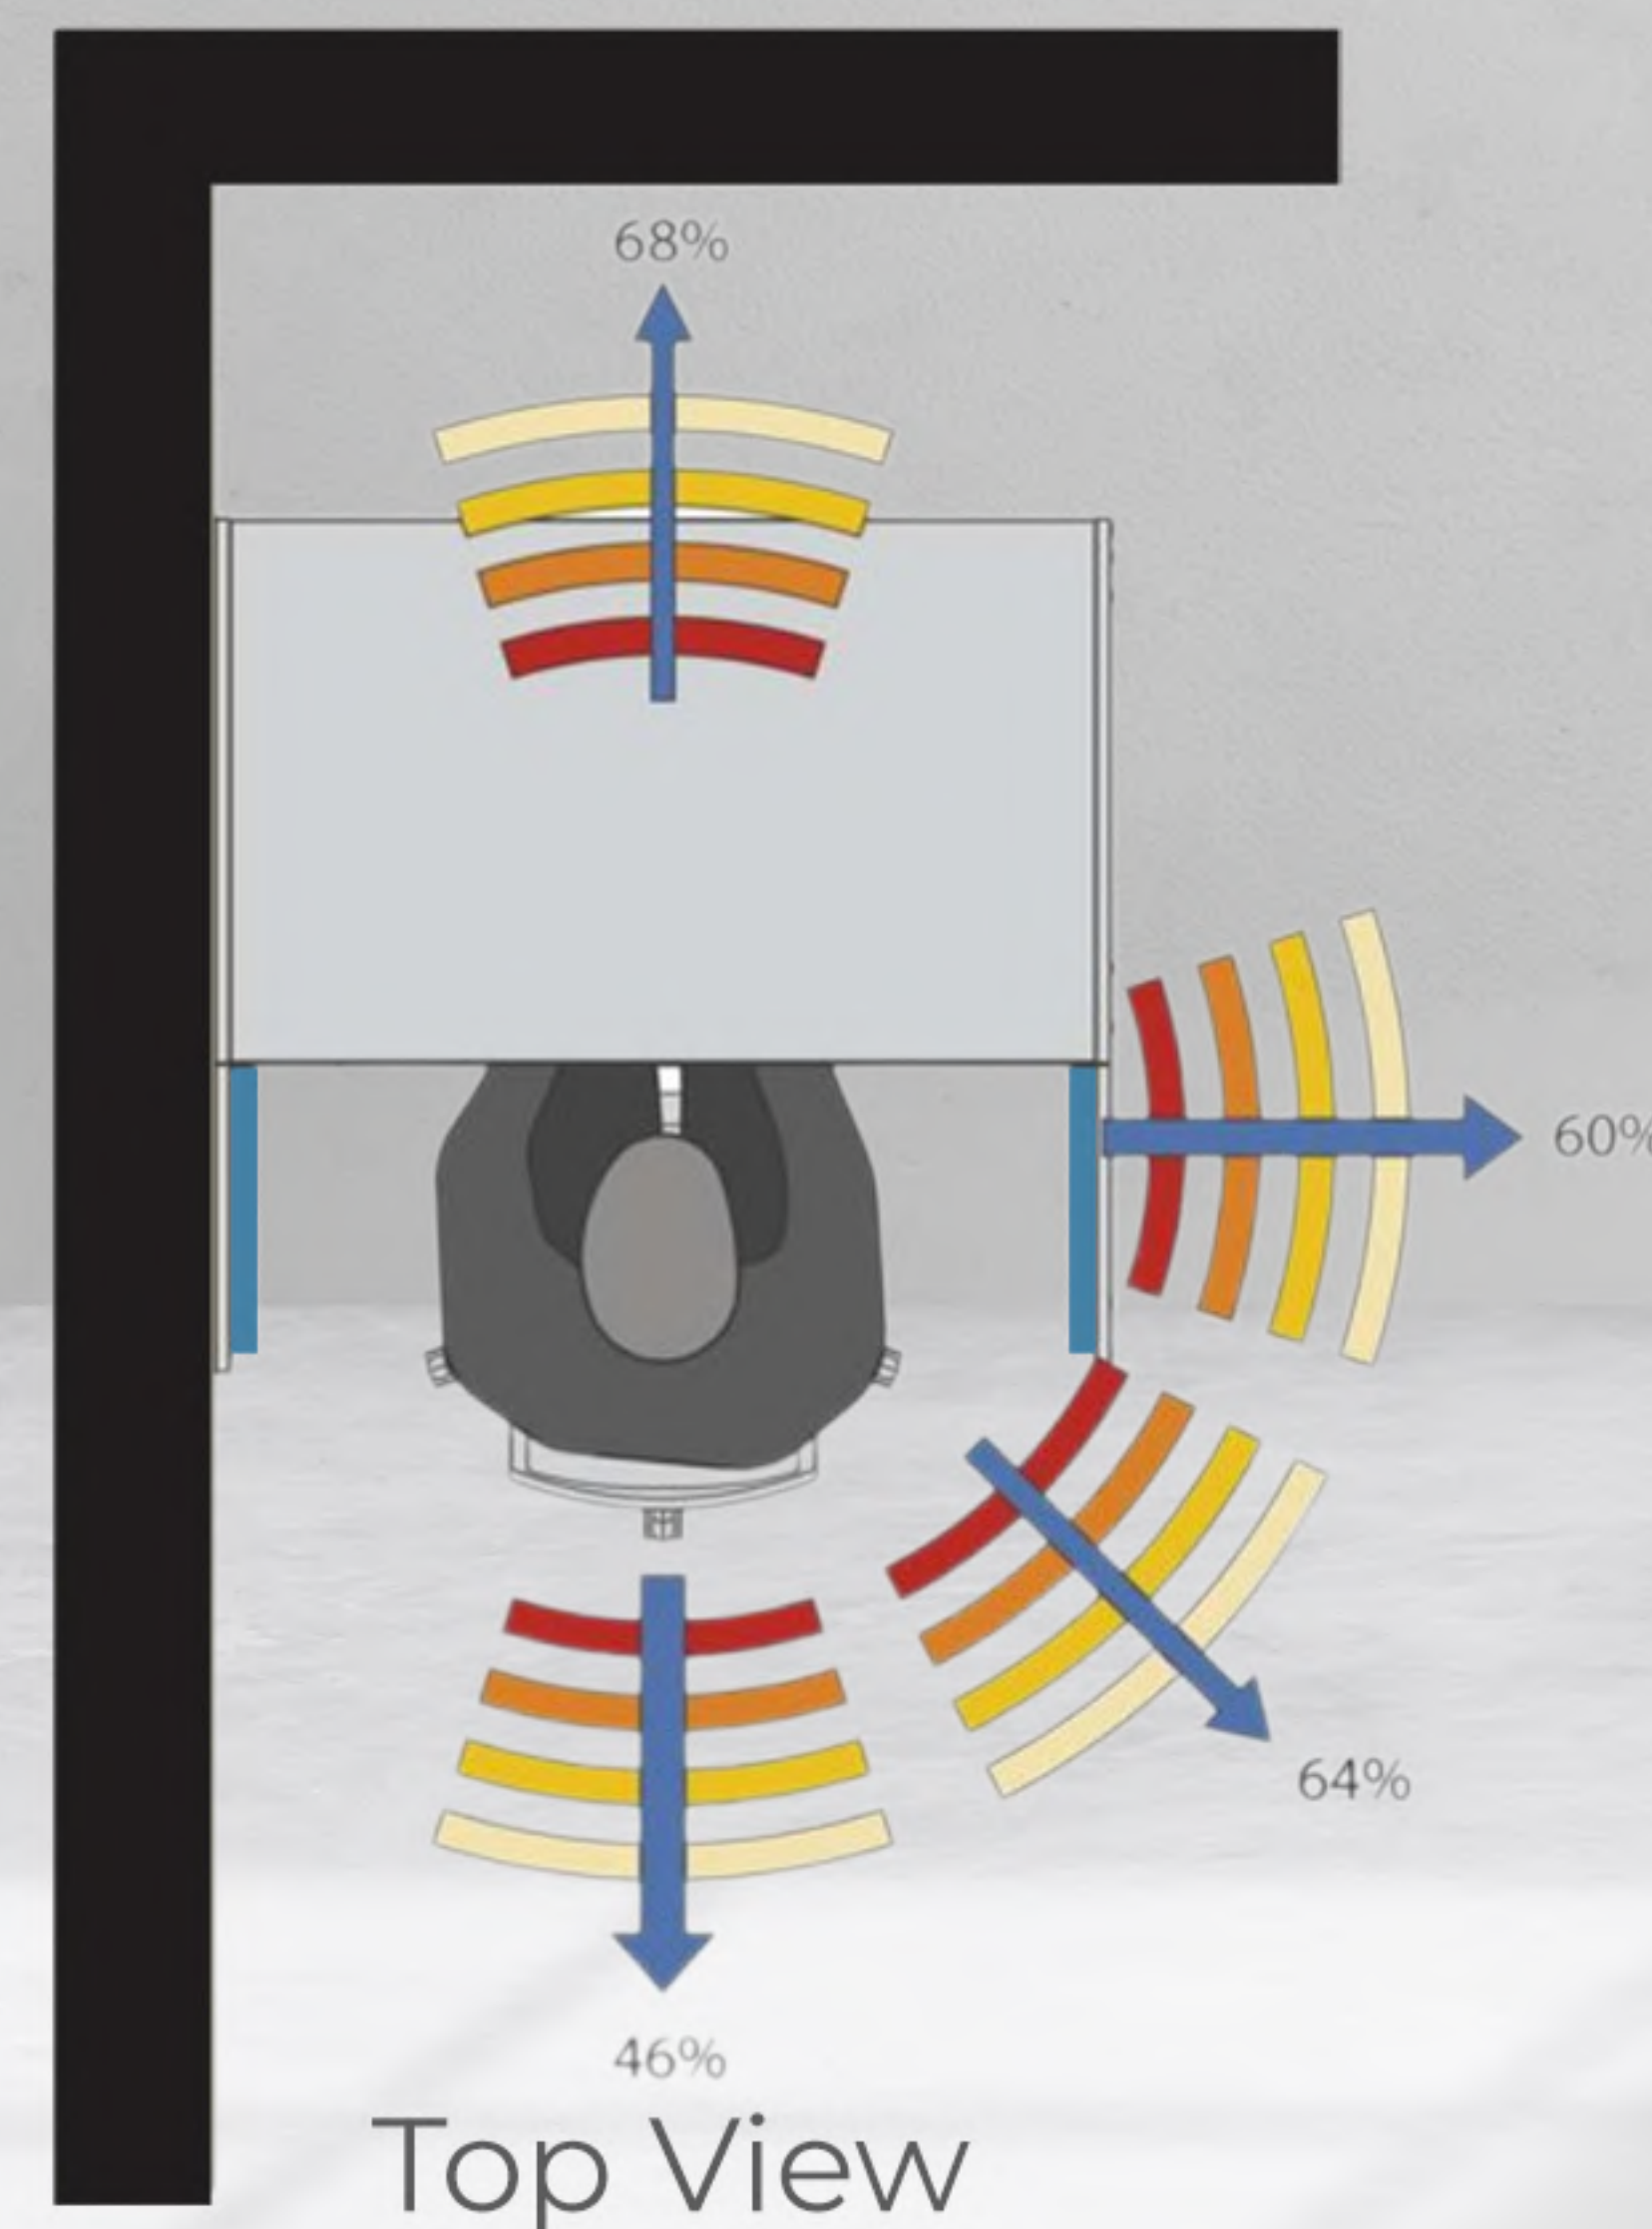

REDUCED DISTRACTION

In testing, BlockAid has shown a notable reduction in distraction for the user. This is achieved by reducing the entry point of sound from the surrounding environment due to the high level of sound isolation incorporated in the design.

PRIVACY IMPROVEMENT

BlockAid has been acoustically tested and shows a notable increase in privacy for the user by substantially reducing what can be deciphered or understood by those on the outside.

BLOCKAID

FOCUS TASK RANGE

The BlockAid Booth has been intentionally designed for easy assembly, disassembly, and a seamless relocation process, all achievable within a single day. This characteristic guarantees that any workspace reconfiguration can be completed with minimal disruption and inconvenience, providing a hassle-free experience.
