

ENGINEERING THE EVOLUTION OF WORKSPACES

The AirSpace focus booth is a locally designed flexible, lightweight acoustic workplace solution for privacy in open plan offices. The pods are tested and manufactured using locally sourced materials. The composite acoustic infill material is manufactured to the acoustic engineers' design & specifications for C.O Designs exclusively.

INTRODUCTION

WE ARE C.O DESIGNS

With the return to the office an increasing number of employees are working in open plan settings. Attempting to concentrate on individual tasks is difficult with the distractions in this type of office layout. Audio visual, Zoom & Teams calls are the order of the day, which in turn disturb & are a distraction for colleagues in the surrounding area.

In addition, many conversations require a level of privacy which is difficult in an open-plan setting, hence the need for places providing enhanced sound insulation in addition to a level of visual privacy - demarcated spaces that also communicate that interruptions are not welcome.

AIRSPACE

PRIVACY BOOTH RANGE

The sound absorption properties will reduce the intense unpleasant effect of sound that bounces around in reflective confined spaces such as work place cubicles. Secondly the sound absorption materials soak up excess sound energy thereby reducing noise levels. This creates a calmer more private ambience in the work place more conducive to productivity. Thirdly, the amount of sound that would ordinarily bounce off the desk divider and arrive as noise at neighbouring and distant workstations is reduced.

DESIGN:

AIRSPACE BOOTH

Activity Based Working provides businesses with the opportunity to rethink how changing their work methodologies can contribute to a more efficient way of achieving their strategic objectives.

Spaces that are flexible and/or designed around various tasks/activities facilitates this new workstyle philosophy.

Activity Based Working enables each person to organize their work activities in a productive and enjoyable way that best suits what they need to do, and who they need to do it with..

DIMENSIONS:

AIRSPACE FOCUS TASK BOOTH

Focus Task Booth - Single:

1200 x 1600 x 1200mmH

Side by Side - Double:

1200 x 3200 x 1200mmH

Focus Task Booth - Single:

1200 x 1600 x 1600mmH

Side by Side - Double:

1200 x 3200 x 1600mmH

AIRSPACE

SOLO TASK BOOTH

AIRSPACE RANGE

Through the inclusion of Focus Booths, such as AirSpace, individuals are better equipped to carry out concentrative tasks free from distraction.

The AirSpace Telepod provides a space for workers to make & receive calls within noisy workspace environments. The 1.8m height provides users with acoustic & visual privacy and comfort.

The AirSpace Telepod is available with either a kinked front panel or a canopy. The kinked front panel provides extra acoustic benefits as well as increased frontal privacy. The canopy provides the same acoustics benefits, whilst enhancing privacy when used around staircases, or in open volume, multi-story spaces.

AIRSPACE

MULTI-LEVEL SEATING

The AirSpace Multi-Level Seating, or 'MLS', provides workers with with a dual height 'break-away' space.

Perfect for taking a break from the permanent workstation in favour of a comfortable spot to continue working or to enjoy a cup of coffee and some light conversation. The AirSpace acoustic panels provide privacy for users at both seating levels.

CONFIGURATIONS:

MULTI-LEVEL SEATING RANGE

The flexible configurations of these MLS units is perfectly suited to open plan work areas, where Activity Based Working is the main methodology. This is particularly useful as a 'touchdown' space to catch up on emails or quick reference work without having to occupy a larger permanent workstation.

AIRSPACE LOUNGE

4 SEATER LOUNGE

The AirSpace Lounge is a semi-private discussion pod, where groups can sit in a shared, conveniently located, private space without occupying a meeting room.

A flexible, lightweight acoustic workplace solution for privacy in open plan offices.

The AirSpace Design facilitates simple and quick relocation of the booth.

AIRSPACE LOUNGE

SOLO TASK POD

The AirSpace Lounge is available with & without a canopy. As with the Telepod, the canopy provides extra acoustic benefits, as well as increased privacy around staircases, or in open volume, multi-story spaces
