

earth-wing

environmentally conscious furniture solution

The Earth Wing range came about by the desire to create a more environmentally friendly and sustainable office furniture suite.

Currently large quantities of steel and aluminium are used in office furniture, materials the processing of which carries a large carbon footprint. Inversely timber, when managed properly in sustainable forestry's, forms a carbon sink reducing the carbon dioxide in the atmosphere.

Ply legs and accents are complemented by timber structural components and frameless screens to reduce the steel and aluminium content while providing a unique aesthetic.

INDEX

- 3 - Clerical
- 4 - Managerial
- 5 - 6 - Executive
- 7 - 8 - Open Plan
- 9 - Meeting
- 10 - Boardroom
- 11 - 12 - Reception

Earth Wing can be configured for any role within an organisation from clerical to executive, meeting and boardroom, and more. A wealth of storage options exists, tailored to suite one's needs, in addition to various ply and timber accessories. It is available in most footprints that one would commonly expect to find in today's office spaces.
